GRASSHOPPER MENACE VERY REAL--PESTS HATCHING OVER WIDE AREA--POISON READY

Pests Are Reported In Scattered Sections--Poison Bait Is Ready For Distribution--Advice Given On Best Method of Using Bait

(By C. E. Yauch, Office of District Agriculturist, Hanna)

The occurrence of young grasshoppers in different parts of the Hanna district is not unexpected. Some damage has already been done, and it is likely that some are not yet aware of the presence of the hoppers. Entomologists have known that an outbreak was inevitable and the Provincial government has made preliminary arrangements for the carrying out of a campaign against the pest. The natural conditions, such as climate, parasites and birds, have not had much influence in reducing the grasshopper population during the past three or four years. Climatic conditions, at least, have been very favorable for the development of grasshoppers. Eventually, these natural factors will reduce the number of the insect, and we will not be troubled with them for some time again.

Artificial Control

Artificially, grasshoppers may be controlled by cultural methods and by the use of poisoned bait. It is now almost too late in the season to carry out any cultural control such as spring ploughing, which buries the eggs so the young hoppers cannot reach the surface. We now have to rely on such means as guard strips and the use of poisoned bait.

A guard strip is simply a cultivated strip two to four rods wide around a field. It acts as a barrier, and the grasshoppers, until they get their wings, are not likely to cross this bare piece of ground. It may be used to keep the hoppers in an infested field, or to keep the hoppers out of summer-fallow or other fields which are free from the insects.

Poison Bait

Poisoned bait is now available at Hanna and Craigmyle. In the application of bait, watch the thermometer rather than the clock. Grasshoppers feed most greedily on bright days when the temperature is between 68 and 85 in the shade. Bait spread on cold, very hot, or cloudy days is wasted. The bait should be spread thinly, right among the hoppers, so that it is eaten before drying out. Ten pounds of bait properly spread will cover an acre of land.

Grasshopper poison is slow in its action, and results may not show for 48 hours after baiting. Satisfactory results will not be obtained by spreading large quantities of bait all at one time with the expectation of killing the hoppers all at once. The better plan is to spread from 100 to 200 lbs. of bait somewhere on the farm every day that the weather is favorable. Bait may be kept 3 or 4 days and re-moistened if it becomes dry.

Poisoned bait is expensive. The instructions on its use in this article should be followed, to prevent waste.

Zealous Dogs Defeat Justice at Michichi

DRUMHELLER, May 19--Over zealousness on the part of village watchdogs enabled yegg men to make their getaway when disturbed in the Charles Ritchie general store at Michichi Thursday night. Since the last raid by safe crackers Michichi storekeeper installed a burglar alarm system which, given initial test in Mr. Ritchie's store, was found to work to perfection, arousing the store owner who immediately dressed and set off from his home to round up his neighbors. His hurried footsteps in the dead of night set dogs howling, the sound of which warned the marauders who beat it off leaving behind them most of their kit.

The burglars warmed up for their safe blowing job by breaking into Michichi post office where they got away with about \$4 in change.

Two arrested at Swift Current, were questioned about this case.

THE ADVANCE WEATHER BULLETIN

Monday, May 28, 1934--In general clear, warm weather, but about Pacific slope and the west showery rains extending to southwest parts of central regions.

Tuesday, May 29--Probably, light showers about central and southern sections, but in general fair, clear and temperatures declining, especially in west.

Wednesday, May 30--Clearing and cooler in nearly all sections. A high pressure area probably covers most of the country, temperatures nearly stationary and only local wind circulation.

Thursday, May 31--Generally clear and slightly cooler but in far northwest probably rising temperatures and increasing cloudiness, with light, scattering rains.

Friday, June 1--Some cloudy weather and light showers about southwest sections of the central provinces, but in general clear and warmer.

Saturday, June 2--Unsettled, with clouds and showery rains about the west and southwest, but around central and eastern sections fair and warmer.

Sunday, June 3--Warmer weather in nearly all parts of the country but soon turning cooler. Probably cloudy and light rains, in spots, along southern borders of central regions.

Week May 28 to June 3, 1934, in central provinces begins clear and warm; remains warm and much of the time clear throughout the week, though probably a short, cool, unsettled spell near Tuesday. Around last of week some scattering showers are to be expected, especially in northwest, west and on Pacific slope, but in general this is forecasted as a warm, quiet, rather dry week, nearly everywhere. Near last days the high pressure gives way to a low disturbance, but only a few light, showery rain clouds are likely to drift in from the west.

At the end of May and beginning of June in these regions the Sun is above the horizon 16 hours every day and if the sky is clear, or even partly cloudy, there is a great flood of hot sunshine. During any week such as this is expected to be, where clouds and showers are few and scattering, all field crops make their most rapid and best growth. As has been predicted, this spring is rather too dry for best results, but yet the normal rainy season of June and July may be relied upon to bring the summer seasonal moisture up somewhere near normal.

For week beginning May 28, 1934

Temperature	Warm	Mild	Cold
Mon.	28		
Tues.	29		
Wed.	30		
Thurs.	31		
Fri., June	1		
Sat.	2		
Sun.	3		

This is for northwest regions; maxima and minima occur 1 day later about central regions; 2 days later near the Great Lakes and 3 days later on Atlantic coast.

Three Teams In League For '34--1st Game 28th

The annual meeting of the C.N.R. Baseball League was in the town hall, Delia, on Monday, with president W. B. Dunlop in the chair. This year the league will operate with three clubs, Delia, Craigmyle and Hanna. Scapa notified the executive of their inability to enter a team this year. Officers elected for 1934 are: Pres., Wm. Currie, Craigmyle; Vice Pres., W. K. McCoy, Hanna, and Sec.-Treas., Wm. Rothwell, Craigmyle. The executive committee will consist of the above officers together with W. B. Dunlop, W. Low and S. W. Miller. The first week's games will be as follows: May 28, Delia at Hanna; May 30, Craigmyle at Delia, and June 1, Hanna at Craigmyle.

Miss Betty Milligan returned from Hanna on Saturday.

Music Festivals And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country; and it is peculiarly fitting that it should. The two seasons are highly compatible.

Spring is essentially the season of song—of the joy of new birth, of life freed from the trammels of winter, of new hope and refreshment, of the seed-time and the filling and bursting of the buds, of the urge to new endeavor, of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of that mirth and jollity the softer sun inspired.

The association of spring with song is universal—has been universal down the ages; for in the spring, nature awakes from long hibernial sleep to the notes of its own orchestra and the song of its own choristers. What more fitting than that the soul of man should "blossom in singing" when spring brings life anew to prairie and woodland!

The music festival idea has given point and purpose to man's urge to vocalize the finer aspects of his emotional existence and experience. The remarkable growth of that idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, emotions never realized nor appreciated to the full unless they are shared, are infallible knitters of closer ties of friendship and fellowship. The association thus cemented inures to a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit—a weaver of the very fabric of community life. Music symbolizes the harmony of which that life is compact and without which it cannot long survive. It is significant that visitors to rural communities of the prairie west have been struck with the fulness of the social life obtaining in them, despite the lack of those adjuncts which are considered indispensable to the amenities of city life. This feature has been remarked upon particularly in relation to the remotest communities where residents have learned to rely upon their own resources and their own proclivities for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary routine.

Music and song have thus become the greatest adjuncts of peace and contentment among the scattered communities of the far-flung prairies. They have contributed greatly towards the alleviation of the pangs of disappointment. They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of kindred tastes together, and demonstrating, as they do, a heritage common to the diverse peoples composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life.

It is right that the winter should be a season of preparation and practice; but it is essential that the festivals should be of the spring. That's where they belong.

Stowaway Makes Good

Boy On Antarctic Ship Has Become Popular With Crew

Fourteen-year-old Einar Lamberg, who stowed away on the whaling factory ship Southern Princess, has made good. Einar was discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper admired the lad's pluck, and made him assistant steward. His quickness and keenness soon made the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Princess and it seemed certain that she would be lost with all hands, Einar proved his worth. His bright cheery manner and utter disregard for danger helped the morale of the older men.

First Bills Of Lading

Were Short Compared To Wordy Documents Of 70- day

Bills of lading in the "good old days" of the sailing vessel were short and snappy as compared with the long details now printed in fine type on the back of such instruments.

A facsimile of a bill of lading issued in 1854 on "the good ship Meteor" from Boston to San Francisco released the ship and everybody connected with it from liability of all kinds in the brief liability clause which read in part, "the goods to be delivered in good order, the danger of sea and fire excepted." In other words, if it got there fine, and if not, it was too bad.

The camel is a native of the North American continent.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Tenants Steal Building

Remove It Piece By Piece To Split Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Khodel, Poland. Back of this is a case of revenge against the renters' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, window by window, they removed their flats several miles away and reconstructed them. Calling to collect his rents the landlord found an empty space where his flats had been. He aroused the village and a search was started. After many days the flats were found. Inside were the tenants, enjoying life without the shadows of a landlord's calls. The irate owner had them arrested, but is puzzling how he will get his building back where it belongs.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved:—"A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs., and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts, and I must say they have done me a lot of good in every way—but chiefly in keeping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and am again steadily reducing. My weight last month was 134 lbs."—(Mrs.) W. H. M.

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—by throwing off those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissues.

"Made In China"

Oriental Make Up Irish Linen Handkerchiefs For American Trade

Handkerchiefs for sale in Atlantic City bearing the tickets, "Pure Irish Linen," and "Made in China," so aroused a visitor that he promptly wrote to the Belfast Times about it. In reply John Gilliland of Belfast, Director of the Irish Linen Guild declared that China is now buying thousands of pieces of linen to be made up into handkerchiefs and embroidered for the American trade. "Although Irish linen is used," he said, "owing to U.S. Customs laws, articles coming into that country can only be accepted if they are marked with the place of origin—that is China. It is really a question of China obeying the Customs laws. As a matter of fact, United States manufacturers are keeping a good grip on the handkerchief trade in America."

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary
Many people who feel sour, sluggish and generally wish to make the mistake of taking calomel, or other drastic medicine, or chewing gum, or roughage which only move the bowels and ignore the liver. What you need is to wake up your liver bile. Start your liver pouring the daily dose of Little Liver Pills into your bowels. Get your stomach and intestines working as they should, once more. Carter's Little Liver Pills will soon fix you up. Purely vegetable. Safe. Sure. Quick. For the liver and bowels. Retail everywhere. 25c. at all druggists.

Organ Built By Blacksmith

Donated His Work And Instrument Only Cost \$300

After four years' work Thomas J. Hoskins, blacksmith, motor engineer and organist, is completing a pipe organ in Pentre, Wales. The instrument, 12 feet high, nine feet wide, and seven feet deep, was made at the forge, and in the garage, the home and the church. Hoskins was organist at the Carter's Cove Methodist Church. The old organ wheezed out, and the congregation was too poor to buy a new one. Hoskins took an old instrument, and from it took pipes and keyboard. Then he made 600 new pipes, from three inches to nine feet long. He bought 20 sheepskins for the bellows, and used 25 pounds of glue, more than 2,000 screws, 15 pounds of nails and much wood. The new instrument will cost \$300. Hoskins has donated all his efforts.

In their natural state the ruby and the sapphire are identical in composition, their difference in color being due solely to naturally included metallic oxides.

Sky Changes Coloring

At Different Altitudes

Moscow Experts Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the experts in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Stratostat which crashed after reaching the record height of over 13 miles.

Investigations are being carried on under the direction of M. Thomson, the senior scientific worker of the Central Weather Bureau. The gondola of the Stratostat carried numerous instruments for making automatic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum observations.

The results of the preliminary investigations are stated to show that the sky gradually changes color as follows: 5.28 miles, marine blue; 6.83 miles, dark blue; 8.08 miles, dark violet; 11.81 miles, dark violet marine; 13.08 miles, dark violet grey; 13.67 miles, black grey.

This evidence bears out observations made by Professor Piccard, the Belgian balloonist, and also by the crew of the Soviet Stratostat U.S.-S.R., which made a previous high record attempt, who reported that the sky at 11.81 miles high was "very dark blue."

The experts state that valuable records of sky colors were made by M. Vassenko up to the time when disaster overtook the balloon at a height, apparently, of 7.46 miles on the downward descent.

Wolves Kill Caribou

Trapper Brings Tale Of Wanton Destruction From North

Bringing stories of terrible onslaughts met by roving packs of wolves while the caribou were migrating, Edwin Sunquist, trapper of the sub-Arctic, reached The Pas, Manitoba, following nine months of travel west of Churchill.

Sunquist with his partners, John Ivanchuk and Charles Hendren, left last July with supplies for winter trapping 165 miles north of Brochet. They travelled by canoe, and reached their headquarters on Oct. 11. During the trip they saw no caribou. But on the morning after their arrival, they went outside to find the migrating herds passing their door. Thousands of animals were moving south. Following close on their heels were packs of from five to 35 wolves. Sunquist said the wolves in many cases killed purely for wantonness, and when there were not deer to knock down, they turned on each other.

Served Three Kings

Royal Servant Is Retiring After Forty-Two Years

Royal servant during the reigns of three British kings, William Dowsett, King's Page, has just retired after 42 years at Buckingham Palace, King George's London residence. "Bill" Dowsett joined the royal service in 1892 as a footman. He gained promotion in successive stages and three years ago was appointed "age of the Black-Stein," an honored position in the service which brings the occupant of it into immediate contact with the sovereign.

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been discovered by the Minister of Lands who reports that rain has not fallen for seven years in some districts.

The tall-growing hybrid dolphins, so popular in Canadian gardens can be raised from seed easily, but, as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

FRETFUL BABIES Quieted!

"If my three baby boys were restless with colic or peevish from their teeth I gave them a Baby's Own Tablet and they were soon asleep," says Mrs. T. Tweedy, 476 Millwood, Toronto. These sweet little tablets remove the cause of fretfulness and the child becomes happy and well again. All the common ailments of little folk are cured by Baby's Own Tablets. Dr. Williams' Baby's Own Tablets. Try one at your druggist's. 15c.

Figures Show Improvement

Average Value Of Canadian Farm Stock Has Increased

The average value of farm land in Canada in 1933, including both improved and unimproved land as well as dwelling houses, barns, stables and other farm buildings, is placed at \$24 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from \$63 per acre in British Columbia to \$10 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Horses, \$52; milch cows, \$31; other cattle, \$17; sheep, \$4; swine, \$8.80. The changes from 1932 values are slight, except in the case of swine, which have almost doubled, having increased from \$4.73 to \$8.80. In the same period the average value of wool increased from five to ten cents a pound. Total value of all farm livestock in 1933 amounted to \$403,135,000, an increase of about \$27,500,000 over 1932. The value of farm poultry is placed at \$33,456,000, a slight falling-off from the value in the previous year.

Average wages of farm hands during the summer season were \$17 per month for men and \$10 per month for women, board and lodgings in both cases, being furnished by the employer. Counting in the value of board the average wages for men were \$32 per month and for women \$22 per month.

Of recent years, a number of promising smooth-awned barleys have been produced by different plant-breeding institutions, including the Dominion Experimental Farms, but these varieties have not yet been tested for a sufficient length of time to any which is the most desirable. For the present, however, the variety called Velvet is favoured in Eastern Canada, while Regal appears most promising in the West.

Iceland's capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

The dahls should not be planted until all danger from frost is over,

May Have Dual Vision

Scientist Thinks Can Adjust Eyes For Day And Night

Raccoons that have reached the laboratories of the University of Colorado psychology department without meeting the usual fate of their kind on college campuses have convinced Dr. Lawrence W. Cole, head of the department, that they have a dual vision, one for daylight and the other for twilight.

Dr. Cole announced that, after two years of intensive experimenting with the furry little animals, he had found that they could tell red from gray, but could not distinguish between two shades of gray.

In a speech in London recently the Prince of Wales urged every young man to become armoured.

FALSE TEETH

Dr. WERNER'S POWDER

Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, shout, laugh—all day long you can forget about them. Simply sprinkle on Dr. Werner's Powder—prescribed by the world's foremost dentists—the one powder that assures 100% secure comfort. SPECIAL FEATURING comfort-cushion protects sensitive gums—always keeps mouth clean and sanitary. Inexpensive—any druggist.

Dust, Rain and Heat Hit Saskatchewan Farms

\$50,000 Damage Caused By Gale Near Regina — Barns Blown Down.

REGINA, May 9 — Property damage of at least \$50,000 was caused when a gale swept Gray Wilcox and Vilbank areas, near Regina, Tuesday night. Barns, stables & garages were smashed and miles of rural telephone lines are down. The roof of a Vilbank convent was blown off.

Dust storms, showers a soaring temperature and heavy rains were all packed into the Saskatchewan weather picture Tuesday, while damages running into several thousand were wrecked along a path to the southeast of Regina as a cyclonic wind tore its way through Wilcox, Gray, Vilbank and adjacent districts.

The storm struck suddenly following a hot afternoon in which the temperature climbed near the 90 mark.

Dense Clouds of Dust

A dense, black cloud of dust swept before the high wind, cut down vision on country roads and highways and wheat fields were reported torn out in some districts.

From showers in the western sections, the rain ranged all the way to a downfall of more than an hour at Regina and other points.

Although Saskatoon district was bathed by warm rains which fell intermittently through Tuesday afternoon, it was experiencing the worst sand and dust storm of the year this morning. The sky became so dark that artificial light was needed indoors.

Scattered showers and thunder storms were being reported from Southern Manitoba last night, but the rain was far from being general. Thunder showers occurred at Brandon, P. tagla Prairie and Minnedosa. A light shower occurred at Souris. Dust storms prevailed earlier Tuesday.

Alberta was warm, and comparatively dry, although Medicine Hat reported moderate rainfall.

Many Horses Die In Southern Districts

SPRING COULEX, MAY 3 (Special) — Reports have come in of the death of several horses east of Bradshaw. Harry Hillmer phoned for a veterinarian when one of his horses became sick, as Bill Hare and Owen Owens have lost five animals with the same symptoms. The horse died before help arrived but a post mortem disclosed about two quarts of dirt wedged tightly in the intestines.

Need Rain Badly, Delia

DELIA, May 16 — Spring work has been rapidly going forward in the Delia district since it began as there has been no wet weather as in other parts of the province. Early sown wheat is two or more inches above the ground. Some farmers are putting in a small acreage of oats on summer fallow this season to ensure a greater amount of feed in the future.

The spring has witnessed more high winds and soil drifting in this district than ever before. Pastures would be greatly improved with a heavy rain. Gardens are being generally seeded this week.

Twenty-five per cent of the wheat has been seeded and plowing will soon be general for oats and barley.

Gleanings From The North-West Farmer

Canadian Government bonds held by public as on March 1934: \$1,858,558,457.24, or nearly three billion dollars.

Interest Paid by Dominion Government to Bondholders \$131,890,287.88, on the above annually. Or over \$361,000 per day for every one of the 365 days in a year.

Nearly 73% bonds payable in Canada 3 1/2%, payable in Canada and N.W. York, 10 1/2%, payable in New York, 13 1/2%, payable in London.

Estimated revenue 1934-35 said to be \$361,000,000 or nearly 40 per cent of estimated revenue required to pay interest on public debt. Provincial and Municipal interest bill additional.

They are various other interest charges bringing the total it is said up to about \$145,000,000 to be met this year by federal treasury.

Public Owned Bank Feature of Next Fight

Finance will be Issue in Coming Dominion Election Says McGeer, M. L. A. for Vancouver.

VANCOUVER, May 21 — The issue of the next Dominion election will be a fight over public ownership of a National Bank, G. McGeer, M. L. A. for Vancouver predicted here today on his return from the east where he laid his views on national financing before the banking committee at Ottawa.

Mr. McGeer declared the Liberals would "carry every seat between Fort William and the coast on that issue."

Wherever I've been, I have found on immediate reaction to the proposition that its time we stopped farming out the right to issue credit, then paying interest to borrow the money thus created.

He declared the committee investigating price spreads was just a glorified red herring.

"Sure they are picking on the tobacco men and a few others—just so much smoke screen. If they want to investigate, why not investigate the profits made by Sir Herbert Holt and other Canadian bankers."

"What is there 'impertinent' in my suggestion to the committee that they should do this? That was suggested in my letter which Mr. Hanson (R. B. Hanson, chairman of the banking committee), said was impertinent,"—Edmonton Bulletin.

There will not be a church service at the United Church on Sunday May 27. Rev. Mr. Woollatt is attending the annual Presbytery meeting.

Secretary of Youngstown And M. D. Leaving For New Position with Olds

Resigns Both Positions; Selected Out of More Than 200 For Situation At Olds.

J. E. McLeod, secretary of the town of Youngstown and of M. D., Sounding Creek, is tendering his resignation to both councils and will be leaving his posts at the end of this month.

Mr. McLeod has just received the appointment as secretary of the town of Olds, the appointment being made Monday when he interviewed the Olds town council.

Mr. McLeod has been secretary of Sounding Creek M. D. for almost nine years and of the town for more than five years. He took over the rural secretaryship in August, 1925 and the town work in March 1929. He is a man of wide experience in municipal work and also in banking, in which he was previously engaged, and his removal will be a distinct loss to the district. He also has taken considerable interest in local sport and Masonic work. We understand that he was selected for his new position out of some 200 applications and we congratulate him upon his appointment. Olds may also be congratulated upon the choice of secretary that town has made.

Mr. McLeod lived in Chinook for a number of years where he was an employee of the Royal Bank.

There is still a few bushels of rutabagas left. Those requiring them apply at Coltham Municipal office.

The Chinook Grosbeak Station will be open Friday morning.
